ELLIE'S DELI

KITCHEN · STAFF ONLY

Scan to open the kitchen

Then enter the kitchen PIN.
Ask the manager if you don't have it.

anthonyghauch.github.io/ellies-deli/admin.html

Running a night

1. **Opening:** switch **Taking orders** on (top of the page).
   Turn it off when the kitchen closes. Customers then see "Kitchen's closed".
2. **New orders** show up on their own, oldest first, one line each.
   The page refreshes every 15 seconds and new orders flash green.
3. **Made it?** Tick **Ready**.
   The customer gets an email and their phone shows "Your order is ready!".
4. **They paid?** Tick **Paid** (card or cash).
   The bar at the top shows what's collected and what's still owed.
5. **Ran out of something?** Open the **Menu** tab and switch it to **Sold out**.
   Customers see it greyed out right away. The **Hungry Man deal** on/off switch is at the top of that tab.
6. **Cancelled or a test order?** Tap the **trash icon** on its row to delete it.
   Customers can cancel on their own until you tick Ready. Use **Unpaid**, **To make** or search to find orders.
